1. In this tutorial I made a newborn beanie, size 0-1 month.

Cut two ovals 38 cm long and 18 cm width. The head circumference is 34 cm, 2x 17cm and 1 cm seam allowance. The fabric is stretchable and the beanie may /must stretch. Use the head circumference and cut 1 extra cm seam allowance. The bigger the beanie, use extra cm

in the width but also in the length!

2. Place the right sides together and stitch around all the way down

3. Fold in half lengthwise and then widthwise, give a tiny cut, about 1.5 cm, in the middle of the round side..

4. Turn around to the right side through (one of) the hole (s).

5. Look at the print of the fabric and decide what the outside and the inside of the cap is. The print on the outside must be in the right way. The print of the fabric should be upside down on the inside. (see first image) Fold one side of the inside to the other side so you can put the fabric layers all together through the hole and pin it.

@AnsjeHandmade
Sew it firmly several times, with a
ansjehandmade zigzag stitch.

7. Turn around and you have a baby beanie. Fold the edge and you have a baby hat ;

8. Iron the beanie with or without the fold.

Done!!!
